

# About Capabl.in

Bridging education and real-world careers

For 12 years, Capabl has been more than just a consultancy; we are an innovation bridge. Founded by a team of IITians and entrepreneurs, we specialize in the high-growth sectors of Agentic AI and EV technology.

Our mission is to solve the complex challenges of the Indian engineering landscape by creating a world-class learning ecosystem. Unlike traditional disruptors, we work with colleges to enhance their curriculum, bringing real-world industry energy into the classroom. With 120,000+ alumni and a portfolio of \$3M+ in deployed tech, we are proud to be globally certified and partnered with KPMG in India and CSI to build lasting capability for the next generation.
